

INFO

From Lord International site:
LORD was established in 1930 with machinery from Solingen, Germany. Over the years this was improved and modernized to stay abreast with the leaders in the industry. In 1978 Wilkinson Sword, formed a joint venture with the company and upgraded the systems, procedures and quality controls.

For political reasons, it was concealed that Lord originated from the company OKAVA Alexandria (later Selar), founded and built by the Jewish partnership of Klotzman and Friedman ...

This is the last normal paper package.
Currently, LORD, like most other
manufacturers, uses packaging made of tape
and foil-covered paper.

INFO

Because not all collectors collect such
packaging (covered with foil or waxed with
a machine print and without graphics, I
place them in the catalog separately.
The sam wrappers are used in boxes and
in plastic dispensers

I myself collect such packaging separately,
including the waxed inner shirts
