**INFO**

Currently, LORD, like most other manufacturers, uses packaging made of tape and foil-covered paper. Because not all collectors collect such packaging (covered with foil or waxed with a machine print and without graphics, I place them in the catalog separately. The same wrappers are used in boxes and in plastic dispensers

I myself collect such packaging separately, including the waxed inner shirts

A Lord product

**INFO**

Gillette produced in Egypt blades with names London Bridge, Nacet and (in latest years) Gillette. It is important to know that Gillette used very similar packaging (as part of globalization) and in factories of other countries (e.g. Mexico, Poland, Czech Republic, Russia). Nacet was name used in many Gillette factories (f.e. in Great Britain, France, African countries ...)

Nacet

factory: Gillette Inter-Nile S.A.E.

**NACET**

**INFO**

Packaging in the "Gillette" pattern has technologically justified fragments from other packaging. Packages in the center of the sheet have four and these on the side, top or bottom of the sheet - two in the appropriate side. So there are five variants. Because there are collectors who collect it - I will mark it in the catalog number after the dash. such a number indicates that there are variants for that package.
