

**INFO**

GILLETTE is world's bigger razor blades company. Razor blades are or was produced in many countries. Most of English ones has equivalents in USA, Germany, France and s.o. I reproduce foreign blades only when is problem with identification.

Reproduced is maybe first of US Gillette wrapper's (from 1904-1905)  
Before Gillette's patent in November 1904 all razor blades was single edge.

**INFO**

Gillette has not printed the country of origin on many packages (and many blades) since the late 1950s, for which we have difficulty specifying the country of production.

**SAMPLE: AUSTRALIAN BOX**

**INFO**

Same looking wrappers - but different country of origin (vide boxes)
